**Subject:** Re: EPA Releases Fourth Set of Sampling Results for Dimock Wells

Hi Roy,  
Thanks for sending out the data.  
I had two questions:  
Why didn't the EPA post the data for two wells: HW07 and HW53?  
What are EPA's next steps in the investigation?

Thanks,

EPA has completed and shared with residents and Pennsylvania state officials the fourth set of sampling for 12 private drinking water wells in Dimock, Pa. This set of sampling did not show levels of contaminants that would give EPA reason to take further action. At one well, EPA found an elevated level of methane and informed the resident, the Pennsylvania Department of Environmental Protection and the Susquehanna County Emergency Management Agency. Throughout EPA's work in Dimock, the Agency has used the best available scientific data to provide clarity to Dimock residents and address their concerns about the safety of their drinking water.

For more information on the sampling results, visit: <http://www.epa.gov/aboutepa/states/pa.html>
